Subject: SSVEC / Net metering

After reading the exchange between The Commission and Jack Blair Jr. in the Sierra Vista Herald last week I wish to voice a concern about what several of us in Winterhaven feel is foot dragging by SSVEC on the net metering program. We were led to believe that we (who installed Solar Electric panels in 2009) would have the new "net meters" by the end of 2009. I personally was told the SSVEC "plan" was on the December agenda for the ACC meeting. Yes, the plan was on the agenda but not the subject of net meters. We have been given no firm timetable now that December has passed but, we were told that it will take time to obtain and install the meters once they are approved by ACC. It's our impression that SSVEC is not in a hurry to install the new meters because once done, their monthly revenue will decline as a result of "credit" we will be accumulating with the help of our Solar panels. In fact, none of us are sure where the extra electricity we currently produce and not use, is going. After Blair's remarks about this program being only for the "wealthy" in Winterhaven and two other new communities in the area, you can understand why we are concerned about the delay in installing the new meters.

I would like to point out that the "wealthy" residents that Blair mentioned are people that have worked hard during their earning years, saved and managed their money, did not over extend on credit and now either own their retirement homes outright or, have very manageable mortgages and live within their means. The Solar project was an opportunity to invest to save additional money and go green at the same time. We did not appreciate Blair's remarks about our so called wealth.

We would appreciate you investigating why the installation of the net meters is taking so long. I personally installed solar in July 2009 fully expecting the new net meter by 12/31/2009. I have several neighbor's that share the same position and have copied them on this E mail.

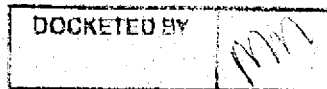

Your investigation would be appreciated.

Subject: Re: SSVEC / Net metering

Excellent feedback, Dennis! You certainly expressed our position.

All the best,

Roy

Thanks Roy. I think we have all been very patient with SSVEC and they continue to stall. I hope more respond to the ACC on this matter.

Dennis
